PROFESSIONAL SUMMARY

Information Technology student at PHINMA University of Iloilo with hands-on experience developing academic and personal software projects. Focused on backend development, REST API development, database management, and web applications using Python, Flask, FastAPI, and SQL-based databases. Experienced in building application features, integrating APIs, designing database structures, and troubleshooting software issues. Seeking an opportunity to contribute to software development projects, strengthen technical skills, and gain professional industry experience.

EDUCATION

Bachelor of Science in Information Technology (BSIT)
PHINMA University of Iloilo
Expected Graduation: 2027

Relevant Coursework: Web Development, Database Management, Systems Analysis and Design, Software Engineering, and Programming.

PROFESSIONAL EXPERIENCE

Project-Based Software Development Experience
Academic and Personal Projects

- Developed backend functionality, database operations, and web application features across academic and personal projects.
- Worked with REST APIs, authentication, database integration, form validation, and application workflows.
- Collaborated with teammates on requirements analysis, system design, implementation, and testing.
- Used Git and GitHub to manage source code and support project development.

ACADEMIC & PERSONAL PROJECTS

HOA Management System
Academic Team Project | In Development

- Contributed to requirements analysis, system architecture, and relational database design.
- Developed backend routes and application features using Python and FastAPI.
- Integrated Supabase and PostgreSQL for data management.
- Worked on homeowner records, dues tracking, authentication, and financial transparency features.
- Coordinated with teammates during system development.

Mrs. Brave Messenger AI Chatbot (StressWare)
Academic Project | Working Prototype

- Developed backend functionality using Python and FastAPI.
- Designed PostgreSQL database structures and integrated Supabase.
- Configured Meta Messenger webhook integration for chatbot communication.
- Implemented order validation, customer confirmation, and database order processing.
- Tested and debugged backend and webhook functionality.

Mrs. Brave Cake Shop
Capstone Project

- Contributed to the development of a cake shop web application for product browsing and order management.
- Worked on customer ordering workflows, booking features, and administrative functionality.
- Used Flask and Firebase technologies for application development and data management.

Sari-Sari Scanner
Mobile Application Project

- Developed an Android-focused inventory application using React Native and Expo.
- Implemented barcode scanning and product lookup functionality.
- Used SQLite for local data storage to support offline inventory access.

BudgetPal
Mobile Application Project

- Developed an offline-first budgeting application using React Native and Expo.
- Worked on budget management, expense tracking, categorized records, and budget history.
- Used SQLite for local data storage.

Barangay Portal System
Web Application Project

- Contributed to a web portal for resident services, announcements, complaints, and document requests.
- Used Flask, MySQL, and Bootstrap to support application functionality and data management.

Solamillo Portfolio Website
Personal Project

- Designed and developed a personal portfolio to showcase software projects and technical skills.
- Managed source code using Git and GitHub.
- Configured deployment through GitHub Pages.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, SQL, HTML5, CSS3

Backend Development: Flask, FastAPI, Jinja2, REST API Development, CRUD Operations, API Integration, Webhook Integration

Databases: PostgreSQL, MySQL, SQLite, Firebase Firestore, Supabase, Relational Database Design

Frontend & Mobile Development: Bootstrap, Responsive Web Design, React Native, Expo, Progressive Web Applications (PWA)

Integrations: Meta Messenger API, AI Chatbot Integration, Google Gemini API, Authentication and Authorization

Tools & Platforms: Git, GitHub, Visual Studio Code, XAMPP, Uvicorn, ngrok, Render, GitHub Pages

Software Development Practices: Requirements Analysis, Database ERD Design, BPMN, Software Testing, Debugging, Technical Documentation

PROFESSIONAL SKILLS

- Analytical and Critical Thinking
- Problem Solving and Troubleshooting
- Team Collaboration
- Communication
- Task Coordination

- Adaptability
- Time Management
- Organization and Attention to Detail
- Continuous Learning

ACHIEVEMENTS & CERTIFICATIONS

Cisco Networking Academy — Completed Courses

- Introduction to Cybersecurity
- Python Essentials 1
- Python Essentials 2
- Data Science Essentials with Python
- Data Analytics Essentials
- Introduction to Data Science

LANGUAGES

- English — Professional Working Proficiency
- Filipino — Fluent
- Hiligaynon — Fluent
